

January 2020 Newsletter

It's 2020 & the year is off to a great start! Our Truss Shop is running smoothly & the newly expanded Metal Shop is enabling us to produce twice as much product without compromising quality. We are very pleased with the results of our expansion & plan to continue growing throughout the years to come. We stand behind the promise that we will continue to provide grade A products & service at fair prices, no matter how much we expand. We truly appreciate your loyalty! Your continued patronage & faith in our products is the reason for our success & growth. Thank you for all your support!! B&A will continue to do everything in our power to secure your ongoing business.

More Reasons to Choose Metal Roofs

We've talked a lot about #1 steel roofing in the past year, expanding our production capabilities to accommodate increasing demand. We'd like to outline some of the lesser known benefits of metal roofs over traditional roofing materials.

As many of you already know, metal roofs cost more than shingles to install.

However, they easily pay you back throughout their lifetime, which is about 3x's longer than asphalt shingles. Metal is a far more durable & long lasting option for residential & commercial roofs alike. Since they require little-to-no maintenance, & have a 50-60yr. lifespan, you'll never have to worry about re-roofing! Metal roofs withstand the elements as they are virtually weatherproof. They can repel winds up to 110-130 m.p.h. & can withstand a barage of hail. Metal is also fire resistant, providing security in many potentially hazardous conditons. Our metal roofs meet or exceed even the strictest building codes in the U.S.! These facts can potentially save you up to 30% on homeowners insurance!

Unlike traditional couterparts, metal roofs are completely unaffected by the growth of mildew, fungus & moss, making them the perfect choice for wooded areas. Steel is also pest-proof. Raccoons & rodents are unable to damage metal roofs to gain access to your attic!

Environmentally friendly & completely recyclable, metal roofs help regulate temperature helping to keep power/AC costs down. Since metal is reflective, it reverts much of the suns heat away from your home. Metal also cools much quicker than asphalt. The benefits of metal roofs extend into the winter months also since they don't leak, preventing water build-up & ice dams from forming in your attic space. Because metal prevents snow & ice accumulation, it's an ideal choice for your roof in any climate.

Besides being beautiful, with a range of color choices, metal roofs are a hassle free, environmentally friendly, power saving roofing option that will serve you & your family for a lifetime. For more details about the different types of metal roofs we offer - Standing Seam, Ag-metal & Metal Shingles - along with their individual benefits, please give us a call! One of our knowledgeable sales reps will gladly help you make an informed decision that fits your personal needs.

Open House / Customer Appreciation Day!!

Please Don't Forget: February 15th from 9am -1pm EST is our annual Open House & Customer Appreciation Day! We'll be giving tours of our expanded metal shop & new truss shop (located at 2875 South US 231, north of Huntingburg). Expect a day of food, drink, demonstrations, prizes & great people! We truly hope to see you there & show you how your support has helped our company grow!
